A. Executive Summary

1. Background:

The SAIEVAC Regional Secretariat under the SDF funding has invested significant efforts to finalize a SMIS, which is expected to become a hub for a wide range of data and information source on Violence against Children in South Asia. This was based on the provisions of the SAIEVAC Project which under its Objective I, Result 3, Impact Indicator I & II elaborates that the project will create better knowledge, understanding and expertise on child protection issues for key stakeholders in the region including government representatives, civil society and child organizations, through:

a) Creation of proper information systems on the different SAIEVAC thematic areas,
b) Identification of institutions that provide such relevant services and,
c) Under taking regional and national training programmes.

The whole SMIS approach was strategized within ‘The SAIEVAC Academy’ – which is the Human Resource Development Strategy developed with the aim of creating and implementing a comprehensive strategy that is expected to facilitate the institution of sustainable HRD programmes for child rights and child protection in the region. The strategy within its objectives includes in the longer term the establishment of a regional data base of existing research work, documentation, best practices, surveys, etc. related to child protection initiatives to enable sharing across the region drawing from regional and international standards / practices further contributing to knowledge management.

To this effect a Short Term Consultancy was executed in January 12, 2015 to develop the SMIS online portal with support of the SDF. The framework of the online portal was also taken up for more in-depth discussion during the 2nd HRDS Consultation held in December 2014, which outlined the following:

a) There shall be three levels of users in the system:

1. Super Admin: Webmaster and SAIEVAC Regional Secretariat
2. Admin/Content Editors: Governing Board Members and National Coordinators who can also access certain information that are not made public
3. Public Users

b) Category of data and information to be housed on the SMIS Portal

i. The data and resources shall be grouped into the following categories:
   - Legislation, Plans of Actions, Policies and Strategy Papers
ii. The thematic areas would be cross cutting which will be tagged with appropriate keywords while uploading the information/resources.

iii. Certain indicator of quantitative data shall be developed that can be compared across countries. The common variables from standard surveys carried out in different countries can be mapped and compiled for the purpose.

c) Process of data sharing/collection system and the use

i. The data and resources shall be shared with the Secretariat by the national mechanisms. The centralized system administration shall be carried out by the Secretariat. While sharing the information and resources, the national mechanisms may suggest whether or not the information is to be made public on website,

ii. The data from other sources than the government mechanism shall be submitted through the NACG Chairs and Co-Chairs in coordination with SAIEVAC government mechanism in the respective countries,

iii. The documents that are publicly released by different state organs may be uploaded on the system by the Secretariat by informing the SAIEVAC government mechanisms in the respective countries,

iv. For any other information from other sources, the consent of the government mechanisms shall be ensured before making the document public on the system by the Secretariat.

d) The following process for the collection of data was agreed during the previous consultation on SAIEVAC Management Information System:

i. Each Member State will have a SAIEVAC Country Office; The Office will host a Program Support Manager responsible for gathering data;

ii. The Program Support Manager in each SAIEVAC Country Office will coordinate with SAIEVAC National Coordinators, NACG and Research Institutions in order to Gather data and forward the data to the SAIEVAC Regional Secretariat. SAIEVAC Program Support Manager should mention purpose of data when requesting data; and also send a format of a document that needs to be filled when data is received;

iii. SAIEVAC National Coordinator in each country will identify a Focal Point / Contact Point in Government Agencies to collaborate with in order to get data that they have. The SAIEVAC National Coordinator is based in the Nodal
Agency, which should be the Ministry of Child Development. (*National Mechanism and Line Ministries in each country to be finalized as soon as possible*);

iv. **NACG Chair / Co-Chair** will coordinate with NGOs and INGOs to gather data and forward to SAIEVAC Country Office

e) **Frequency of Gathering Data:**

Bi-Annually

f) **Housing and Analyzing Data**

The SAIEVAC Regional Secretariat will house an adequate software system, which will be able to house, analyze and share data.

2. **The Regional HRD Training Workshop on SMIS**

The Regional HRD Training Workshop on SMIS was convened in Paro, Bhutan from the 22-24th of June 2015. The workshop was attended by SAIEVAC National Coordinators, Data and Information Officers and NACG Representatives form the IAs besides officials of the LIA/SRS.

The Workshop was convened with the following Objectives:

1. To review, refine and endorse the SMIS online portal,
2. To familiarize with the different components of the online portal and provide hands on practice on data and information upload,
3. To discuss and agree on the collection, compilation, validation and sharing of data and information
4. To discuss and seek consensus on data and information analysis and use,
5. To undertake hands on practice and compilation/uploading of data and information on the online portal, and
6. To review and assess the implementation of the project activities of IAs and define strategies on the remaining activities if any

The Training Workshop after 3 days of intensive exercise covering the deliberations on the SMIS Framework step by step followed by hands-on practice and data upload on the SMIS portal, endorsed the following recommendations:

1. The SMIS portal and the policy framework as elaborated in the SMSI Technical Manual is formally endorsed to be used as the main basis to create a vibrant data and information online portal which can be used by all stakeholders as the window to assess progress, challenges, gaps, and successful interventions on Violence against Children in South Asia, both regional and national;

2. The SRS to refine the SMIS portal to make it more user friendly in terms of uploading AV products which would greatly reinforce the sharing of good practices and case studies;
3. The SRS AND SAIEVAC National Mechanisms will coordinate in continuously scanning and mapping out generation of new data and information and use the process defined for data collection, sharing and upload in the SMIS Technical Manual;

4. The SMIS will now be the basis for evaluating the SAIEVAC 5 Year Workplan 2011-2016 and will be guiding factor for formulating the 2017-2022 Workplan;

5. The SRS in collaboration with National Mechanisms and regional partners invest efforts to produce a quarterly Child Rights Journal and an Annual Year Book on Child Rights using the data and information on the SMIS; and

6. The SRS will prepare the end product of the SMIS post Paro Training Workshop and table the recommendations of the Workshop to the 5th Governing Board Meeting for its kind review and formal endorsement.

B. Business Session:

1. Briefing on the SMIS Conceptual Framework:

The DG SRS presented the SMIS Conceptual Framework by first providing a recapitulation on the work undertaken during the 2nd SAIEVAC Academy Consultation held in December 2014 in Pokhara, Nepal.

In order to ensure that the Training Workshop takes into consideration some of the concerns raised during the Group Exercise during its deliberations over the next 3 days, he re-tabled the following points for greater clarity:

“It was proposed that the glossary of key terms needs to be uploaded on the system to ensure common understanding of the terminologies used. Also, online discussion forum can be established to promote the exchange of ideas.

A proposal was made to make the system flexible for introducing additional thematic areas other than those prioritized in the current Five-Year Plan of SAIEVAC. It was clarified that the system is open for introducing additional categories of data. It was held that the SMIS needs to be developed as a resource hub with training materials, session plans and other information for the use by the national mechanisms. With regard to the question on whether or not certain announcements can also be part of the system, it was suggested that the existing website of SAIEVAC can be used for such announcements.

The discussion stressed that the management structure for the system needs to be clearly defined that includes human resources involved in collecting and maintaining the data including the national mechanisms. Also, the quality check and ethical clearance for the data also needs to be explicit within the management structure. The sources of data and validation of the data also requires more attention.
A concern was raised on whether not the national mechanisms, particularly the Governing Board Members and National Coordinators will have access to the system to add or modify the data on their own. Also, the need of consulting the national mechanisms for ensuring the authenticity of the sensitive information posted on the SMIS was highlighted. It was made clear that the system has the flexibility of adding users with different levels of permissions for read and write access on the system. Also, the continuous review and improvement of the system will address the concerns of the member states as they emerge”.

Following this he presented the Conceptual Framework so that the participants will have a better understanding of this when the SMIS Portal Demonstration is presented in the subsequent agenda item.

**CONCEPTUAL FRAMEWORK**

Regional HRD Training Workshop on SAIEVAC Management Information System (SMIS) (22 - 24 June 2015, Paro, Bhutan)

**INTRODUCTION**

- The SAIEVAC Regional Secretariat under the SDF funding has invested significant efforts to finalize a SMIS, which is expected to become a hub for a wide range of data and information source on Violence against Children in South Asia.

- This was based on the provisions of the SAIEVAC Project which under its Objective I, Result 3, Impact Indicator I & II elaborates that the project will create better knowledge, understanding and expertise on child protection issues for key stakeholders in the region including government representatives, civil society and child rights organizations, through:
  - Creation of proper information systems on the different SAIEVAC thematic areas,
  - Identification of institutions that provide such relevant services and,
  - Undertaking regional and national training programmes.
The whole SMIS approach was strategized within ‘The SAIEVAC Academy’ – which is the Human Resource Development Strategy developed with the aim of creating and implementing a comprehensive strategy that is expected to facilitate the institution of sustainable HRD programmes for child rights and child protection in the region.

The strategy within its objectives includes in the longer term the establishment of a regional data base of existing research work, documentation, best practices, surveys, etc. related to child protection initiatives to enable sharing across the region drawing from regional and international standards / practices further contributing to knowledge management.

To this effect a Short Term Consultancy was executed in January 2015 to develop the SMIS online portal with support of the SDF, the framework of which is at Annex – 1.

The framework of the online portal was also taken up for more in-depth discussion during the 2nd HRDS Consultation held in December 2014, which outlined the following:

a. There shall be three levels of users in the system:

i. **Super Admin**: Webmaster and SAIEVAC Regional Secretariat

ii. **Admin/Content Editors**: Governing Board Members and National Coordinators who can also access certain information that are not made public

iii. **Public Users**
b. Category of data and information to be housed on the SMIS Portal

i. The data and resources shall be grouped into the following categories:
   - Legislation, Plans of Actions, Policies and Strategy Papers
   - Images, Audio/Video and Multimedia Resources
   - Research Reports, Progress Reports and Technical Papers
   - Training Manuals and Resources
   - News Reports
   - Court Cases and Verdicts
   - Other Information

ii. The thematic areas would be cross cutting which will be tagged with appropriate keywords while uploading the information/resources.

iii. Certain indicators of quantitative data shall be developed that can be compared across countries. The common variables from standard surveys carried out in different countries can be mapped and compiled for the purpose.

c. Process of data sharing/collection system and the use

i. The data and resources shall be shared with the Secretariat by the national mechanisms. The centralized system administration shall be carried out by the Secretariat. While sharing the information and resources, the national mechanisms may suggest whether or not the information is to be made public on website,

ii. The data from other sources than the government mechanism shall be submitted through the NACG Chairs and Co-Chairs in coordination with SAIEVAC government mechanism in the respective countries,

iii. The documents that are publicly released by different state organs may be uploaded on the system by the Secretariat by informing the SAIEVAC government mechanisms in the respective countries,

iv. For any other information from other sources, the consent of the government mechanisms shall be ensured before making the document public on the system by the Secretariat.

d. The following process for the collection of data was agreed during the previous consultation on SMIS

i. Each Member State will have a SAIEVAC Country Office; The Office will host a Program Support Manager responsible for gathering data;

ii. The Program Support Manager in each SAIEVAC Country Office will coordinate with SAIEVAC National Coordinators, NACG and Research Institutions in order to Gather data and forward the data to the SAIEVAC Regional Secretariat. SAIEVAC Program Support Manager should mention purpose of data when requesting data; and also send a format of a document that needs to be filled when data is received;

iii. SAIEVAC National Coordinator in each country will identify a Focal Point / Contact Point in Government Agencies to collaborate with in order to get data that they have. The SAIEVAC National Coordinator is based in the Nodal Agency, which should be the Ministry of Child Development. (National Mechanism and Line Ministries in each country to be finalized as soon as possible);

iv. NACG Chair / Co-Chair will coordinate with NGOs and INGOs to gather data and forward to SAIEVAC Country Office
e. Frequency of Gathering Data:

Bi-Annually

f. Housing and Analyzing Data

The SAHEVAC Regional Secretariat will house an adequate software system, which will be able to house, analyze and share data.

---

g. Specification of the Software

Features of the Software
- Input qualitative and quantitative data
- Analyze data including comparative analysis, generating trends
- Generate reports against indicators
- Export tables, graphs, maps of analysis
- Accessible via a web interface for public viewing
- Export data in a variety of formats (such as CSV, Excel, etc.)
- The website will also provide general descriptions and links
- Search function

---

i. **Technical requirements**
   - Hardware: Servers Firewalls
   - Backup Drives and media Internet Connection

ii. **Software:**
   - Web server Software application Microsoft Office

iii. **Schedule of Backing-up Data**
   - Weekly Full Back up
   - Daily Incremental Backup
   - Monthly Backup for storing at separate location

---

**Publishing and Sharing Data**

- **Policy on Publishing and Sharing Data**
- Confidentiality must be maintained - only broader spectrum of details may be discerned; no children may be identifiable individually
Following the presentation, the discussions focused on the process for data collection, validation and periodicity of data sharing. The discussions also covered issues relating to data and information that was not generated by the Government mechanism but by NACGs that includes UN/INGO partners.

The DG SRS provided clarifications to the issues raised and underlined that the SMIS is to ensure that it has the ability to showcase whatever data and information is available on the SAIEVAC thematic areas both at the National and Regional levels. However, the sensitivities of certain data and information that are generated without having been cleared through proper validation systems or ethical considerations will be dealt with as per standard procedures as defined within the SMIS Framework.

The discussion further drew consensus that the issues can be further discussed when the relevant agenda items are tabled subsequently.

2. Demonstration of the SMIS Online Portal and allied features

Mr. Binit Shrestha, IT Consultant to the SRS building on the SMIS introduction presented by the DG SRS, took the Participants through a step by step demonstration of the SMIS Online Portal. While doing this and since the participants will be going through practical use of the online portal country wise, focused his highlights on the following areas.
a. **Back End**: An administrative system through which only authorized personnel from the Secretariat and the member states can access / maintain and upload new information to the system. The system is centrally monitored at the secretariat and any form of modification / addition of content by any other users other than the superadmin has to go through a process of verification / validation until its published.

a.1 **Qualitative Information** can be categorized under different thematic areas or different user defined categories. A new information may exist under single or multiple categories and can be country specific or may be applicable to multiple countries.

Multiple Media (Attachments: Documents, PDF, Picture files, Youtube videos) can be embedded in the qualitative content through media assignment.

The status of the new information can be monitored and controlled from within the system. Only those information which are checked to be published will be visible in the front end.

Options for Social media sharing / print / export of the content can be controlled from within the system.

A new information is labelled as Public by default which means any new information / content checked to be published will be visible to all. However, there’s an option to label the content to be visible to only a specific group. Any documents / information labeled as "Not Visible to Public" will not be visible to the general mass but only to the ones who are logged in to the system. *This was discussed and approved amongst the member state representatives, experts and SRS officials during the HRDS meet in Pokhara on 25th December, 2015.*

a.2 **Banners**

Dynamic Sliding Banners along with some accompanied texts can be created / altered from within the system. The Banners will be visible in the front end.

a.3 **Categories**

5 thematic Areas are defined as the main categories. Multiple user defined categories can be defined and an 'n' number of sub categories can be formed within those categories as per requirement. Each content will then come under at least one of the categories. A content may exist under multiple categories as per the relevance of the information.

a.4 **Content Source**

As per the meeting held in Pokhara from 24-26 December, 2015, experts exerted on the importance of defining the source of the content. Hence, the content source can be defined for each new information added to the system.

a.5 **Countries**

Countries / Country related information / media can be modified and monitored from within the system.
a.6 Modules
Custom Modules can be created as per requirement.

a.7 Menu Management
Menu Items can be created / altered dynamically from within the system. A root menu may have 'n' numbers of sub items.

a.8 Media / File repository
An online file explorer serves the purpose for media / file management. The design is replicated from a normal Operating System file browsers / explorers to maintain simplicity.

a.9 Global Settings
Global settings / user permissions / user privileges / user management / group management can be defined within the system.

a.10 Quantitative Information (Pending)
Quantitative information is yet to be included in the system. The next version of the system will have features to add in dynamic forms to include different types of quantitative information. The technicalities involved will be defined and will be included in the system once the various range of data / information is identified.

The system has been developed in the platform of the latest version of PHP, Javascript and the database system used is MYSQLi.

Fig: Backend Screenshot
b. Front End

The Initial template has been designed and developed and integrated with the back end. The responsive template is user friendly and easy to use, to maintain simplicity. Few template options besides the base option is also being discussed and developed at the moment.

The front end has features to sort country specific information / content and has a user friendly interface to browse through and search relevant information with ease.

Different modules can be placed within the defined template positions as per requirement.

*The front end has been developed in the platform of the latest version of PHP, Javascript, CSS3 and the database system used is MYSQLi.*

---

![Initial Template front end - Screenshot](image)

---

C. Status:

- Design / Development of the system has been completed
- Requires initial content / information (real content) from all the thematic areas (atleast a few from each categories from each member states) to test the feel/look and the technicalities of the system
- Requires further Content addition / Data entry
- Requires further insights regarding the range of quantitative data / information
- The system is yet to be migrated to the approved online location (ie. http://www.saievac.org/mis). It will be migrated and made LIVE once SRS approves of the initial look and content.
3. Review of data and information from the different MS (IAs) relevant for the SMIS and Sources of Data and Information Collection and the process of validation/Sharing.

The different Member States shared in turn the type of data and information pertaining to the SAIEVAC thematic areas which can be directly uploaded on the SMIS online portal during the Training Workshop. The data and information were of both qualitative and quantitative and largely consisted of what is officially published or are in public domain. However some of the Member States had also data and information that were official but restricted due to certain sensitivities.

The participants during the course of the presentation also raised the need to define a clear schedule for data collection and sharing within the Member State but also with the SAIEVAC Regional Secretariat. After careful consideration and also taking note of the provision/guidance included in the SMIS Technical Manual, it was endorsed that the different stakeholders in the Member States will maintain a close coordination to ensure that there is no confusion in this. The SRS also assured the Member States that a close consultation and coordination will be maintained as the process becomes activated fully.

The discussion also considered the provision for the role of the SRS in collection, upload of data and information, maintaining the online portal and analyzing and generating reports.

The data and information that the MS shared were then used for uploading on the online portal during the Group Exercise in Country Groups.

DAY – 2 (23 June 2015)

4. Briefing and Discussion on Post 2015 agenda including VAC targets, goals and the process leading to September 2015, commitments of SAARC Member States and positions on VAC within the agenda, and implication in case of inclusion/non inclusion of VAC targets in the SDGs.

- Ms. Kendra Gregson, SACG Chair (UNICEF ROSA) & Technical Referee, SRS

Ms. Kendra Gregson in her briefing covered the following areas.

- In September 2015, Heads of State and Government will convene in New York, at the United Nations, for a summit to announce the successor framework to the Millennium Development Goals (MDGs). The new framework will have poverty eradication at its core, and serve as a new sustainable development agenda for the world. Within the discussion on what this agenda will look like there has been increasing recognition that to eradicate poverty, to achieve sustainable development, the issue of violence must be addressed, and specifically violence against children.
In the lead up to the General Assembly in September, governments are reflecting on the specific goals as well as possibilities to reach them. Both of these have the potential to result in proposals that will weaken the violence agenda – as there are too many goals or it is too difficult to implement. Now is the time for continued focus with government to emphasis the value of the proposed violence aspects of the post-2015 agenda, and highlight that it is possible to make them a reality.

In brief she said there are 17 proposed sustainable development goals (SDGs) for the post-2015 agenda. Addressing violence against children (VAC) is evident in five of these goals as evidenced in the targets proposed:

GOAL 1: END POVERTY IN ALL ITS FORMS EVERYWHERE

GOAL 2: END HUNGER, ACHIEVE FOOD SECURITY AND IMPROVED NUTRITION AND PROMOTE SUSTAINABLE AGRICULTURE

GOAL 3: ENSURE HEALTHY LIVES AND PROMOTE WELL-BEING FOR ALL AT ALL AGES

GOAL 4: ENSURE INCLUSIVE AND EQUITABLE QUALITY EDUCATION AND PROMOTE LIFELONG LEARNING OPPORTUNITIES FOR ALL

4.A Build And Upgrade Education Facilities That Are Child, Disability And Gender Sensitive And Provide Safe, Non-Violent, Inclusive And Effective Learning Environments For All

GOAL 5: ACHIEVE GENDER EQUALITY AND EMPOWER ALL WOMEN AND GIRLS

5.2 Eliminate All Forms Of Violence Against All Women And Girls In The Public And Private Spheres, Including Trafficking And Sexual And Other Types Of Exploitation

5.3 Eliminate All Harmful Practices, Such As Child, Early And Forced Marriage And Female Genital Mutilation

GOAL 6: ENSURE AVAILABILITY AND SUSTAINABLE MANAGEMENT OF WATER AND SANITATION FOR ALL

GOAL 7: ENSURE ACCESS TO AFFORDABLE, RELIABLE, SUSTAINABLE, AND MODERN ENERGY FOR ALL

GOAL 8: PROMOTE SUSTAINED, INCLUSIVE AND SUSTAINABLE ECONOMIC GROWTH, FULL AND PRODUCTIVE EMPLOYMENT AND DECENT WORK FOR ALL

8.7 Take Immediate And Effective Measures To Secure The Prohibition And Elimination Of The Worst Forms Of Child Labour, Eradicate Forced Labour And, By 2025, End Child Labour In All Its Forms, Including The Recruitment And Use Of Child Soldiers
GOAL 9: BUILD RESILIENT INFRASTRUCTURE, PROMOTE INCLUSIVE AND SUSTAINABLE INDUSTRIALISATION AND FOSTER INNOVATION

GOAL 10: REDUCE INEQUALITY WITHIN AND AMONG COUNTRIES

GOAL 11: MAKE CITIES AND HUMAN SETTLEMENTS INCLUSIVE, SAFE, RESILIENT AND SUSTAINABLE

11.7 By 2030, Provide Universal Access To Safe, Inclusive And Accessible, Green And Public Spaces, In Particular For Women And Children, Older Persons And Persons With Disabilities

GOAL 12: ENSURE SUSTAINABLE CONSUMPTION AND PRODUCTION PATTERNS

GOAL 13: TAKE URGENT ACTION TO COMBAT CLIMATE CHANGE AND ITS IMPACTS

GOAL 14: CONSERVE AND SUSTAINABLY USE THE OCEANS, SEAS AND MARINE RESOURCES FOR SUSTAINABLE DEVELOPMENT

GOAL 15: PROTECT, RESTORE AND PROMOTE SUSTAINABLE USE OF TERRESTRIAL ECOSYSTEMS, SUSTAINABLY MANAGE FORESTS, COMBAT DESERTIFICATION, AND HALT AND REVERSE LAND DEGRADATION AND HALT BIODIVERSITY LOSS

GOAL 16: PROMOTE PEACEFUL AND INCLUSIVE SOCIETIES FOR SUSTAINABLE DEVELOPMENT, PROVIDE ACCESS TO JUSTICE FOR ALL AND BUILD EFFECTIVE, ACCOUNTABLE AND INCLUSIVE INSTITUTIONS AT ALL LEVELS

16.1 Significantly Reduce All Forms Of Violence And Related Death Rates Everywhere

16.2 End Abuse, Exploitation, Trafficking And All Forms Of Violence Against And Torture Of Children

16.9 By 2030, Provide Legal Identity For All, Including Birth Registration

GOAL 17: STRENGTHEN THE MEANS OF IMPLEMENTATION AND REVITALIZE THE GLOBAL PARTNERSHIP FOR SUSTAINABLE DEVELOPMENT

She informed the participants that the SACG is bringing a consultant on board who will develop and technical briefing paper and certain advocacy materials which can be used by the Member States and SRS for targeted advocacy with higher authorities.

The discussions explored a range of opportunities to create a better understanding of the Post 2015 agenda and how targeted can be undertaken so as to have some meaningful outcome by the time the UNGA considers the agenda towards the end of September 2015.
The following areas were considered as possible opportunities during the discussions:

1) Development of Materials, briefing papers which can be used by the SAIEVAC mechanisms for advocacy and awareness creation on SDGs;
2) SAIEVAC mechanisms to make efforts to link with the respective Ministry of Foreign Affairs who are responsible for representing the National agenda at the UN;
3) Make efforts to brief the parliamentarians on the SDGs and the opportunities for children;
4) Identify country delegates to the 7th SAARC Tc on Women, Youth and Children being convened in Islamabad in August and provide briefing on the SDGs so that the agenda also becomes mainstreamed within the SAARC mechanism.
5) SACG to provide briefing papers at the earliest to the SRS and for SRS to share with the SAIEVAC National mechanisms (Governments and NACGs).

5. Group Exercise:

Group I : Data and Information Officers and NACG Group

a) Anchoring and Uploading Data and Information, Security of Data and Information

b) Demonstration of Qualitative Information Back-End and Data Entry – Data entry of Qualitative Information: Hands-on Practice, Queries and Resolutions

c) Quantitative Database Back-End, Data Entry of Qualitative Information: Hands-on Practice, Queries and Resolutions

The participants were first given a re-run on how to operate the online portal and upload both qualitative and quantitative data and information, by the IT Consultant. The Country Groups coordinated by the respective Data and Information Officers started the process of familiarizing themselves with the online portal and on how to maneuver the steps for data and information upload.

Thereafter all the Country Groups initiated data and information upload which can be viewed at:

http://hoi.com.np/demo1/saievacmis/

Group II : SAIEVAC National Coordinators and PSMs

Refer Separate Report
6. Discussion on SAIEVAC Project Issues, project closure procedure, project reports and SDF guidelines/procedures etc
   - SDF Secretariat

   Refer Separate Report

7. Final Discussions and Way Forward:

   The Training Workshop after 3 days of intensive exercise covering the deliberations on the SMIS Framework step by step followed by hands-on practice and data upload on the SMIS portal, endorsed the following recommendations:

   I. The SMIS portal and the policy framework as elaborated in the SMIS Technical Manual is formally endorsed to be used as the main basis to create a vibrant data and information online portal which can be used by all stakeholders as the window to assess progress, challenges, gaps, and successful interventions on Violence against Children in South Asia, both regional and national;

   II. The SRS to refine the SMIS portal to make it more user friendly in terms of uploading AV products which would greatly reinforce the sharing of good practices and case studies;

   III. The SRS AND SAIEVAC National Mechanisms will coordinate in continuously scanning and mapping out generation of new data and information and use the process defined for data collection, sharing and upload in the SMIS Technical Manual;

   IV. The SMIS will now be the basis for evaluating the SAIEVAC 5 Year Workplan 2011-2016 and will be guiding factor for formulating the 2017-2022 Workplan;

   V. The SRS in collaboration with National Mechanisms and regional partners invest efforts to produce a quarterly Child Rights Journal and an Annual Year Book on Child Rights using the data and information on the SMIS; and

   The SRS will prepare the end product of the SMIS post Paro Training Workshop and table the recommendations of the Workshop to the 5th Governing Board Meeting for its kind review and formal endorsement.
